

Not Just Another Product... a True Business Opportunity

The Eastside LEAFAWAY™ Machine is the industry's only dual system gutter machine ever built.

LEAFAWAY™ is roll-formed into a seamless full size 5" K-Style (OGEE) gutter covered by a debris shedding shield with an exclusive pooling design. Liquid adhesion and gravity draw the water into your gutter while shedding debris from your roof eliminating structural damage caused by failed gutters.

LEAFAWAY™ Gutter Machine's 3 spools allow for color combination flexibility

Specially designed internal screw mounted brackets secure the system to the fascia board eliminating damaging roof attachments.

Our Dual Leaf Protection System allows the ultimate in work flexibility. Switching from a LEAFAWAY™ job to a standard full size 5" K-Style (OGEE) gutter is quick and easy, don't bring in another gutter machine, just convert and go! You can even offer your clients over 30 color and finish combinations, something no one else can.

The time is NOW to invest in a true, stand alone and highly profitable business. Offer a truly unique product and give yourself the flexibility of becoming a full service rainware professional. Follow the next five steps and discover your independence TODAY!

What - Only Combination Gutter Protection System! • When - NOW!
Where - In Your Local Community • Why - Unique Business Opportunity
How - 888.391.2550 Call Today!

The LEAFAWAY™ 15" chop saw allows you to cut 90° for end runs and 45° angles for inside and outside corners or any custom angle required.

It also pivots 90° on a turntable for chopping downspouts or fascia boards. The chop saw makes disposal of old gutters easier too.

Run the full LEAFAWAY™ gutter system at one job, move to your next job and run standard 5" K style gutter. You can also use the LEAFAWAY™ gutter system to chop up old gutter which will save you time and money. Eastside Machine Company has combined over 40 years of engineering and manufacturing expertise with roll-formers into this new, revolutionary LEAFAWAY™ Machine.

Standard features include: 2 HP motor, steel forming rolls all hard chrome plated, factory sealed bearings, cradle with 3 spools, phase III variable speed output of 30 to 45 feet per minute and a two year warranty.

The addition of an Eastside LEAFAWAY™ dual system gutter machine means added profit potential and a quality product for your customer. Eastside LEAFAWAY™ Machines give you the ability to offer a unique product that can be manufactured on-site with dependability time after time.
